### Restriction /Election

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5 and 8 are drawn to a catalyst comprising mixed metal oxides, classified in class 502, subclass 300.
- II. Claims 6 and 9 are drawn to a process of producing an unsaturated carboxylic acid, classified in class 562, subclass 544.
- III. Claims 7 and 10 are drawn to a process of producing an unsaturated nitrile classified in class 558, subclass 303.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, Group II, and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are Group I and Group II.

The invention of Group I is related to the catalyst system comprising mixed metal oxides, whereas the invention of Group II involves the process of producing an unsaturated carboxylic acid. The invention of Group I can be employed in a different process ; for example, Smith (U.S. 3,689,520) discloses a catalytic process for aromatic isocyanates using a metal oxide catalyst system .

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Furthermore, these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
